## SUMMARY

Full Stack Developer and Systems Administrator with 2+ years delivering production systems for a US-based client. Built a custom Authorize.net CIM payment gateway, a bidirectional LDAP–WordPress sync plugin with group-based access control, and an AI-driven social media content generation and posting API — all running in production. Beyond client work, independently developed full-stack applications including a MERN stack e-commerce platform and Manverse, a complete Django + Next.js web application with AI integration. Owns the full stack end-to-end: PHP/WordPress, Django, Next.js, PostgreSQL, Docker, Nginx, and Linux server management on cloud infrastructure.

## SKILLS

|                   |                                                                                        |
|-------------------|----------------------------------------------------------------------------------------|
| <b>Backend</b>    | Python · Django · DRF · Node.js · Celery · REST APIs · JWT · Shell Script              |
| <b>Frontend</b>   | JavaScript · Next.js · React · TypeScript · Tailwind CSS · WordPress (PHP)             |
| <b>Databases</b>  | PostgreSQL · Redis · MongoDB · MySQL                                                   |
| <b>DevOps</b>     | Docker · GitLab CI/CD · GitHub Actions · Nginx · Linux Server Admin · Kamatera · AWS   |
| <b>AI / Other</b> | Groq AI · OpenAI API · Odoo · LDAP · Git · Authorize.net PHP SDK · Stripe · SSLCommerz |

## EXPERIENCE

**Full Stack Developer & Systems Administrator** · My Nature's Delight

*Jun 2023 – Present | Florida, USA · Remote*

- Implemented Authorize.net CIM payment gateway using the official PHP SDK — handling customer profiles, recurring billing, and secure transactions in production
- Built a bidirectional LDAP–WordPress sync plugin: syncs users between LDAP and WordPress, maps LDAP groups to WordPress roles for group-based access control
- Developed an AI-driven API that generates content and auto-posts to social media platforms, deployed on the MND marketing server
- Built custom WordPress plugins and Odoo ERP backend integrations; site built with PHP and JavaScript — no React
- Spin up, monitor, patch, and upgrade Linux production servers on Kamatera — Docker, Nginx reverse proxy, GitLab CI/CD, automated backups, 99.9% uptime

## PROJECTS

**Manverse — Full-Stack E-Commerce Platform** · 2026

*Django · Next.js · PostgreSQL · Redis · Celery · Docker · Nginx · Groq AI · Stripe · SSLCommerz · GitHub Actions*

- End-to-end e-commerce platform — product catalog, cart, checkout, JWT auth, Stripe & SSLCommerz payment integrations, and AI chatbot powered by Groq AI
- Fully containerized with Docker, self-hosted CI/CD via GitHub Actions on VPS, Nginx reverse proxy

**Live:** <http://manverse.duckdns.org/> **GitHub:** [github.com/Ashikmahbub/manverse](https://github.com/Ashikmahbub/manverse)

**Plant Shop** · React · Node.js · Express.js · MongoDB · Stripe · CI CD · SSLCommerz · Docker · VPS Deployment

Full-stack MERN e-commerce app — product browsing, cart, checkout with Stripe and SSLCommerz payment integration — live on Vercel

**Live:** <http://plants-shop.duckdns.org/> **GitHub:** [github.com/Ashikmahbub/plant-shop](https://github.com/Ashikmahbub/plant-shop)

## EDUCATION

**B.Sc. Electrical & Electronic Engineering** · CGPA: 3.71

*Daffodil International University, Dhaka*
